

LED Classic Filament Lamps

The LED Filament Classic Lamps are designed to resemble a traditional incandescent light bulb with visible filaments for aesthetic and light distribution purposes but with the high efficiency of LED. Matching the look of traditional incandescent bulbs, the LED filament lamps, produce the same warm light while being more energy efficient and fully dimmable. With a clear glass finish made to show off the filaments, you can get the same feel and atmosphere as with the old-style incandescent bulbs, however, the frosted finish is also available in some models.

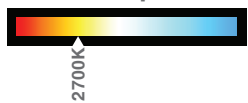

Features and Benefit

- Replaced less frequently, ideal for hard-to-reach places
- Exceeds all industry performance requirements
- UL and RoHS Certificate
- Save up to 80% energy
- Long life, 15.000 average life

Applications

- Decorative lights
- Exterior and interior lights
- Fans
- Candlesticks
