

LED Solar Street Light

Whether you need light to enhance visibility or improve security, the Zolu Lighting LED Solar Street Light is the best solution to light any roadway, parking lot, path, trail, fence line, park or complex. These environmentally friendly, energy-efficient off-grid lighting solutions lower costs by reducing the fees associated with a conventional light bulb. Compact volume and lightweight design have been thought to give you the best performance. Each fixture provides the needed lighting levels and distribution patterns to provide the perfect lighting solution to meet the requirements of the application.
